## New Auditorium in 2016

Will address 50-year-old, worn, outdated, and unsafe auditorium space located on the Ashwaubenon High School campus. Current facility holds only 440 spectators, even though school and community populations have tripled in size since original construction. Many unsafe conditions restrict use, and features needed to meet needs are non-existent.

### **New auditorium will include:**

- Stage 66% larger than current to hold entire school band, a variety of performance types, community and visiting performance venues
- House seating of 700 + spectators
- ADA accessibility standards, wheelchair seating, and full handicap access to performance, house, and restroom areas
- Ample performer and audience entrance/exits to address safety concerns
- Wing space 73% more than current
- Acoustical shells and wireless microphone system to direct and enhance performance sound
- LED performance lighting system
- Orchestra Pit for safe and acoustically sound musician space
- Dedicated single-sex dressing rooms
- Dedicated and safe Stagecraft shop
- Dedicated and safe lighting and sound space
- Fly rigging with electrics to safely drop in and pull out scenery, screens, and other equipment
- Multipurpose/Practice/Green Room space for future finishing
- VIP Room space for future finishing
- Size appropriate restrooms
- Storage, Wardrobe & Prop Space

## Projected Cost & Funding Plan

Not to exceed \$8 million. The Village of Ashwaubenon's residents approved an April 1, 2014 referendum leading to bond issue. Final facility design was provided for construction bids in summer 2015.
